## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 112***

1. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

2. Claims 1-4 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention.

In regards to claims 1 and 3, they recite, among other features, "providing a pre-charging signal to the current source to have the storage capacitor discharged in advance". On pages 7-8, paragraphs 22-24 of the specification, there is mention of a pre-charging signal provided to discharge a capacitor in advance. However, there is no description of how applying a pre-charging signal can cause a capacitor to discharge based on Figures 1-2.
